

Presses

Case Study

50 Ton Trim Presses

Overview:

These custom 50 Ton Trim Presses were incorporated into a whole cell. This turn key solution was integrated into a robotic cell along with a variety of other after cast equipment.

Achievements:

Utilizing linear transducer technology, the position of the ram could be monitored reducing overall set up time for each new project.

Horse Power Limiting pumps improved overall efficiency.

All safety circuits were compliant with CSA Z142.
